ACADEMIC PROJECTS

Recipe Generator   The Ohio State University   (April 2015)
- Collaborated with 2 other team members in creating a Ruby on Rails web application called Recipe Generator where users can search for recipes and create accounts to add recipes.
- Utilized Yummly API for the search function, Bootstrap framework for overall site cleanliness, and Git/GitHub for version control.
- Individual responsibilities: programmed search function via the Yummly API, designed the layout of all site pages by utilizing the Bootstrap framework, coordinated group meetings
- Results: All required functions of the web application worked smoothly; received A on project

INTERNSHIP EXPERIENCE

eVAL Agency, Columbus, OH
Front-End Development Intern (Feb, 2015 - June, 2015)
- Completed various front-end development projects for a small startup for 14 hours per week while maintaining a full course load.
- Projects: cooperated with another intern in redesigning menu bar and multiple pages of client's WordPress site; utilized the Bootstrap framework to design and create a simple landing page for a client; created a 3 page Wordpress brochure site for a client; created support pages and tested for bugs in client's website
